

UCI Assessment Grant Program—Winter 2010 Proposal Abstracts

- **Jeanne Scheper, Women's Studies:**

The goal of this project is to develop the Women's Studies Senior Research Seminar as an on-going site for conducting assessment of learning outcomes for the major. Implementation of assessment rubrics in Spring 2010 will establish baseline information. The results will be used to develop assessment rubrics, to formulate goals for ongoing assessments, to calibrate learning outcome goals with stated department missions. Multiple activities include blind rubric analysis of student writing and qualitative evaluation of public oral presentations, exit interviews with seniors and alumnae, research resources from the 2007 Report on Assessment and Integrative Learning for the National Women's Studies Association, consultation with core faculty, syllabus review.
